INTRODUCTION

My work spans software development, system administration, and day-to-day infrastructure support, and I am most comfortable when I am building, fixing, or improving something that people actually use. I like working with databases, Linux servers, website hosting, and backend systems, and I take pride in being dependable, practical, and eager to keep learning. I am especially interested in roles where I can combine hands-on technical support with development and server management to create reliable digital solutions.

EXPERIENCE

Locus enterprises Pvt. Ltd, System & Network Administration, (2026 - Present)

I work on database management, website hosting, and server support in a practical production environment. I handle SQL database dump, backup, restore, and migration tasks to support system maintenance and recovery. I also assist with website hosting and deployment, including domain and server-side configuration. My role involves managing and troubleshooting Linux-based servers, providing IT support for web and server infrastructure, and working with Nginx for website configuration, virtual host setup, reverse proxy management, and issue resolution.

PROJECTS

Flow Sync Traffic Optimization

- Built a Traffic Light Optimization System Web app that adjusts traffic light duration based on vehicle density.
- Used Python-Django, React.js, YOLO.

Laptop Hospital Web App

- Built a web-based platform for purchasing laptops and accessories.
- Ensured a seamless shopping experience with an intuitive UI/UX.

LPG Gas Ordering System

- Designed and implemented a backend infrastructure to handle user authentication, inventory management, and order processing.
- Integrated secure payment gateways and real-time order updates.

TECHNICAL PROFICIENCIES

- **Programming & Tools:** Next.js, JavaScript, Node.js, C, C++,Python, MongoDB, MySQL,Tailwindcss ,Git & GitHub , Gitlab
- **Operating Systems:** Windows (10/11), Ubuntu, Kali Linux (for penetration testing), macOS (basic usage)
- **Skills:** Database Management, SQL Backup & Restore, Database Migration, Linux Server Administration, Website Hosting & Deployment, Nginx Configuration, Virtual Host Setup, Reverse Proxy Management, Server Troubleshooting, IT Support, Problem-solving, Code Analysis, UI/UX Design, Backend Development, Bash Scripting
- **Languages:** Nepali, English, Hindi
- **Design Tools:** Canva, Adobe Creative Suite (Photoshop, Illustrator, Premiere Pro)

EDUCATION

B.E (IT)	2019 - 2025
Nepal College Of Information Technology , Balkumari Lalitpur	
+2, Science	2019
Gorkha International Public Secondary School, Ghorahi, Dang	
SEE	2017
Janajyoti Vidyamandir, Ghorahi, Dang	

CERTIFICATIONS

Python AI Training	2024
Broadway Infosys , Shri Ganesh Marg, Kathmandu	
Hackfest (Best Innovation)	2024
Nepal College Of Information Technology , Balkumari Lalitpur	
Palo Alto Networks Cybersecurity Foundation	2025
Palo Alto Networks	
AWS Educate Getting Started with Networking (Badge)	2025
Amazon Web Services (AWS)	
Crash Course on Python	2025
Google	

ACTIVITIES & INTERESTS

- **Technology Enthusiast:** Exploring emerging technologies like IoT, Artificial Intelligence, and Cloud Computing.
- **Hackathons & Coding Challenges:** Participating in hackathons and coding competitions to solve complex problems and develop innovative solutions.
- **Continuous Learning:** Staying updated with the latest tech trends and frameworks through online courses, webinars, and tech communities.
- **Personal Projects:** Building side projects to experiment with new tools and improve full-stack development skills.
- **Gaming & Problem-Solving:** Enjoying strategy games and puzzles to sharpen analytical and logical thinking.
